

Custom Software • Dashboards • Data Systems • Automation • Mobile Apps

Company Overview

Leisure Apps LLC delivers secure, modern software, dashboards, and workflow automation for government & enterprise teams. Our AWS certified engineering provides end to end solutions that improve visibility, reduce manual work, & replace outdated systems without large agency cost/complexity.

Core Competencies

Custom Software Development

Backend systems in Java and Python. Secure REST APIs. Frontend applications in React, Angular, JavaScript, TypeScript, HTML, & CSS. iOS (Swift) and Android (Kotlin) mobile apps.

Workflow Automation and Integrations

Intake systems, approvals, routing, and notifications. Data cleanup, validation, and classification. Cross-platform integrations across SaaS products and internal tools. Targeted use of machine learning for summaries, categorization, and triage when appropriate.

Dashboards and Reporting

Custom dashboards for finance, operations, real estate, logistics, and leadership. KPI consolidation from spreadsheets, databases, and exports. Interfaces designed for fast operational decision making.

Cloud Architecture (AWS Certified)

AWS Solutions Architect experience across compute (EC2, Lambda, Elastic Beanstalk, ECS, Fargate), storage (S3, EFS, Glacier), databases (RDS, DynamoDB), networking and delivery (VPC, load balancers, Route 53, CloudFront, API Gateway), monitoring and security (CloudWatch, IAM, GuardDuty, KMS), and CI/CD pipelines.

DevOps and Continuous Delivery

Container-based and traditional deployment pipelines using AWS CodePipeline, CodeBuild, CodeDeploy, Jenkins, and IBM UrbanCode Deploy (UCD). Docker image builds. Infrastructure-as-code practices for repeatable environments.

Differentiators

- AWS certified architecture and delivery experience.
- Fast turnaround with direct access to the engineer doing the work.
- Budget aware solutions designed for city, county, and K-12 environments.
- End-to-end ownership from requirements through deployment and documentation.
- Secure, maintainable systems without unnecessary complexity.
- Clear communication for both technical and non-technical leadership.

Past Performance and Products

*Projects showcase full-stack engineering, mobile development, AWS deploys, authentication, & dashboard design.

AnalystDash – Custom dashboards and business websites that provide real-time visibility into performance for finance, operations, logistics, and SaaS teams. (www.analystdash.com)

DatePool – Released January 2025. Full-stack iOS and Android social platform with matching logic, secure messaging, notifications, and AWS-hosted backend infrastructure.

Ideal Alley – Released December 2021. Skills focused employment matching platform with workflow design, dynamic matching criteria, and a clean responsive interface.

NAICS Codes and Technology

- 541511 – Custom Computer Programming
- 541512 – Computer Systems Design
- 541513 – IT Systems Management Services
- 541519 – Other Computer Services
- 518210 – Data Hosting and Cloud Services
- 541430 – Web and UI Design
